

## Unit VI: Industrialization and Economic Development

### Models

Core-Periphery Model  
Dependency Model  
Weber's Least Cost Theory  
Cristaller's Central Market Theory  
Rostow's Stages of Development

### Development

Human Development Index  
Levels of Development  
Measures of Development  
Quality of Life  
Gender Issues  
Gross Domestic Product  
Gross National Product

Location/Types of Retail  
Industrial Regions of N. America and the World  
Ubiquitous Industries  
Footloose Industries  
International Division of Labor  
Comparative Advantage  
Outsourcing  
Maquiladora Plants  
Agglomeration Industries  
Deglommeration

### Industry & Services

Types of Services  
Land Rent (aka bid rent)  
Vertical Use of land  
Horizontal Use of land  
Suburbanization of business

Transportation costs  
Transportation Mode Costs  
Break of Bulk point  
Intermediate point

### Infrastructure

Location of Industries  
Raw Material Orientation  
Bulky  
Perishible  
Weight Losing  
Market Orientation  
Bulky  
Perishible  
Weight Gaining  
Least Cost Theory  
External Factors: Subsidies, zoning, tax breaks, etc.

Transnational Corporations  
International Trade  
Supranationalist Trade Organizations  
World Trade Org  
NAFTA  
European Union

Economic Function of cities  
World Cities  
Dominant  
Major  
Secondary  
Regional/Subregional Centers  
Specialty Centers
